CONSORT
TRANSPARENT REPORTING OF TRIALS

Home Extensions Downloads Examples Resources About CONSORT

Welcome to the CONSORT Website

CONSORT stands for Consolidated Standards of Reporting Trials and encompasses various initiatives developed by the CONSORT Group to alleviate the problems arising from inadequate reporting of randomized controlled trials.

The CONSORT Statement

The main product of CONSORT is the **CONSORT Statement**, which is an evidence-based, minimum set of recommendations for reporting randomized trials. It offers a standard way for authors to prepare reports of trial findings, facilitating their complete and transparent reporting, and aiding their critical appraisal and interpretation.

The CONSORT Statement comprises a 25-item **checklist** and a **flow diagram**. The checklist items focus on reporting how the trial was designed, analyzed, and interpreted; the flow diagram displays the progress of all participants through the trial. The CONSORT "Explanation and Elaboration" document explains and illustrates the principles underlying the CONSORT Statement. We strongly recommend that it is used in conjunction with the CONSORT Statement. In addition, **extensions of the CONSORT Statement** have been developed to give additional guidance for RCTs with specific designs, data and interventions.

PRISMA
TRANSPARENT REPORTING OF SYSTEMATIC REVIEWS AND META-ANALYSES

HOME PRISMA STATEMENT EXTENSIONS TRANSLATIONS PROTOCOLS ENDORSEMENT

Welcome to the Preferred Reporting Items for Systematic Reviews and Meta-Analyses (PRISMA) website!

PRISMA is an evidence-based minimum set of items for reporting in systematic reviews and meta-analyses. PRISMA focuses on the reporting of reviews evaluating randomized trials, but can also be used as a basis for reporting systematic reviews of other types of research, particularly evaluations of interventions.

Who should use PRISMA?

- Authors: PRISMA aims to help authors improve the reporting of systematic reviews and meta-analyses.
- Journal Peer reviewers and editors: PRISMA may also be useful for critical appraisal of published systematic reviews, although it is not a quality assessment instrument to gauge the quality of a systematic review.

News Feed

PRISMA Website re-design

The PRISMA website underwent a much-needed update in October 2015 to update the content of the website. We have updated the look of the site and added the PRISMA extensions, translations, and information about review protocols.

PRISMA Extensions!

Several PRISMA extensions have been published in 2015 so far:

- PRISMA-P for developing review protocols was published in January 2015 in *Systematic Reviews* and the *BMJ*.
- PRISMA-IPD (individual patient data) was published in *JAMA* in April.
- PRISMA-NMA (Network Meta-Analyses) was published in *Annals of Internal Medicine* in June.

These are in addition to the PRISMA Abstract and Equity extensions, all found on the PRISMA website, [here](#).

The toolkits related to CARE were designed to increase the accuracy and transparency of evidence from the point of care to inform clinical research, clinical practice guidelines, and medical education. These toolkits contain the CARE checklist and Writing Templates in multiple languages, Timeline Writing Instructions and Timeline Examples in English and CARE extensions. CARE extensions from specialty groups with whom we have collaborated are available on this site as well. These tools are available to improve the completeness, transparency, and usefulness of case reports for clinicians, researchers, educators, and patients.
